

Did everyone make an equal contribution to the group work?

I would say so, everyone helped where they dan and it was great that for most of it the group really showed up for everything together.

Were complementary skills of the group members efficiently exploited?

Yes, when discussing what needed to be done, we made sure that everyone felt comfortable with what they were doing and were good at it as well.

What was the amount of cooperation and participation and knowledge transfer within the group?

We had 2-4 physical meetings and 3 virtual ones. If we were not meeting we would regularly talk over text about how things were going and what needed to be done.

How effectively did you work together on the project?

We all communicated and divided the tasks, we also kept up with one another and helped each other when needed.

Did you have a good division of labour?

Yes.

Did you help each other?

Yes.

How were skills transferred?

During the meetings we would go over what we were doing and what needed to be done, which gave a prettje good insight of peoples skills. By seeing how people worked you could really pick up a thing or two of what you could do yourself as well.

What were your contributions to the group?

Help set up the script used. Assist with and participate in the trial run, record the audio that was later transcribed, help solve the issues that we ran into, data annotation.

What where you most valuable own contributions to the group work?

I would say the annotation and my role during the experiment.
